

# Autistica Charity IT Project

- Aim
- Stakeholders
- Stakeholder desires
- Communication and team structure
- Process so far
- Resources
- Actions
- Questions

To **produce** a **platform** that will **enable** the  
**Autistic community** to **record** daily  
sensory **experiences**

The Fujitsu logo, consisting of the word "FUJITSU" in red capital letters with a red infinity symbol above the "i".

**The  
Alan Turing  
Institute**

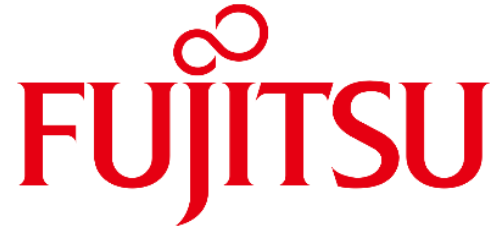

**AUTISTICA**

Autistic  
Community

Everyone Else

Understanding Autism to help our staff be more productive

Showing our customers we are a genuine responsible business

Chance to create a textbook example of how internally we can conduct an open source and Agile style software development project

## **The Alan Turing Institute**

Conduct research into the Autistic community so they can advise government, public bodies and industry how to better adapt physical spaces

Project to be open to all

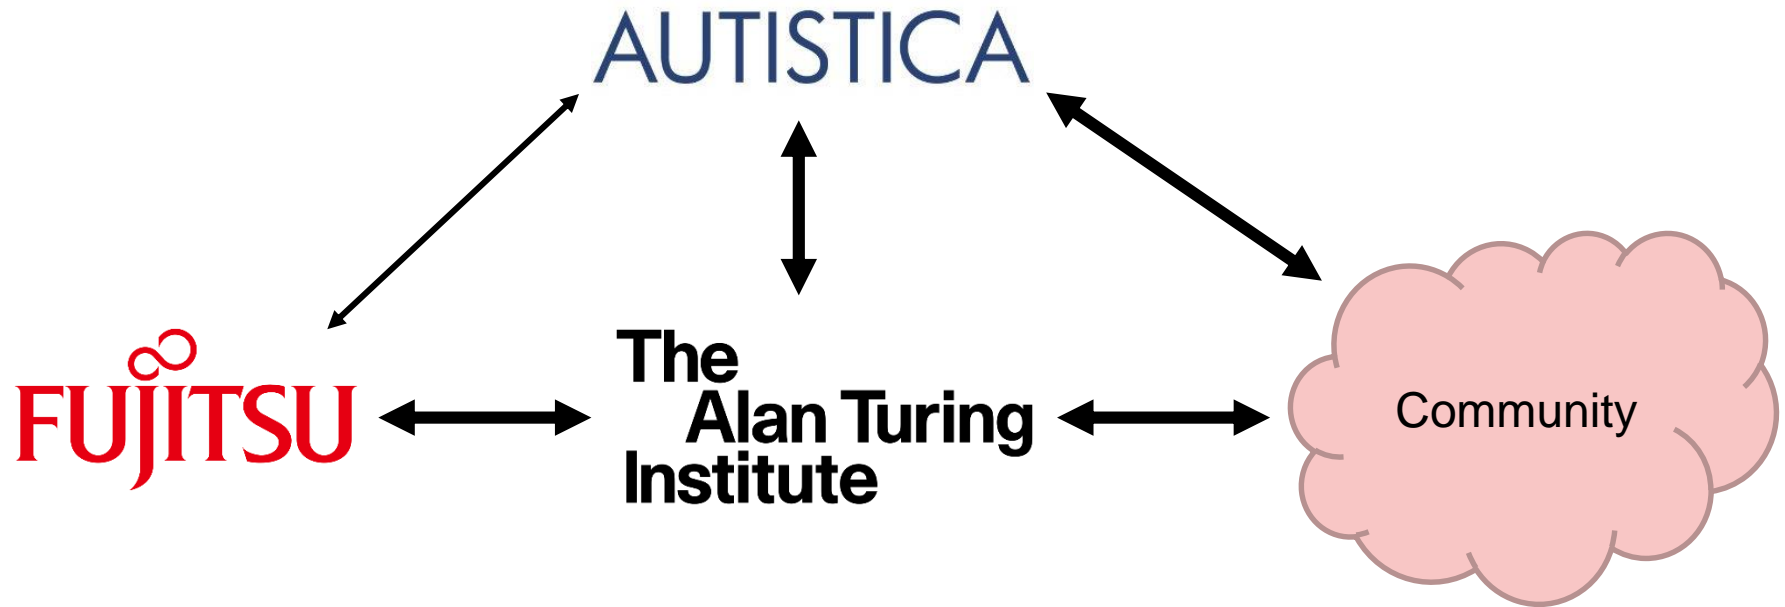

## AUTISTICA

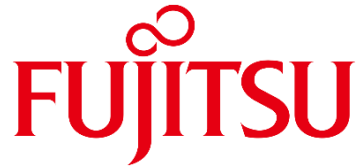

Better understanding of Autism and problematic sensory issues

Understanding coping mechanisms

A platform that respects personal data and choices around data sharing

**The  
Alan Turing  
Institute**

Craig Hall  
(Responsible  
business head)

Andrew Harding  
(Project lead)

Thomas Stanley  
(Product Owner)

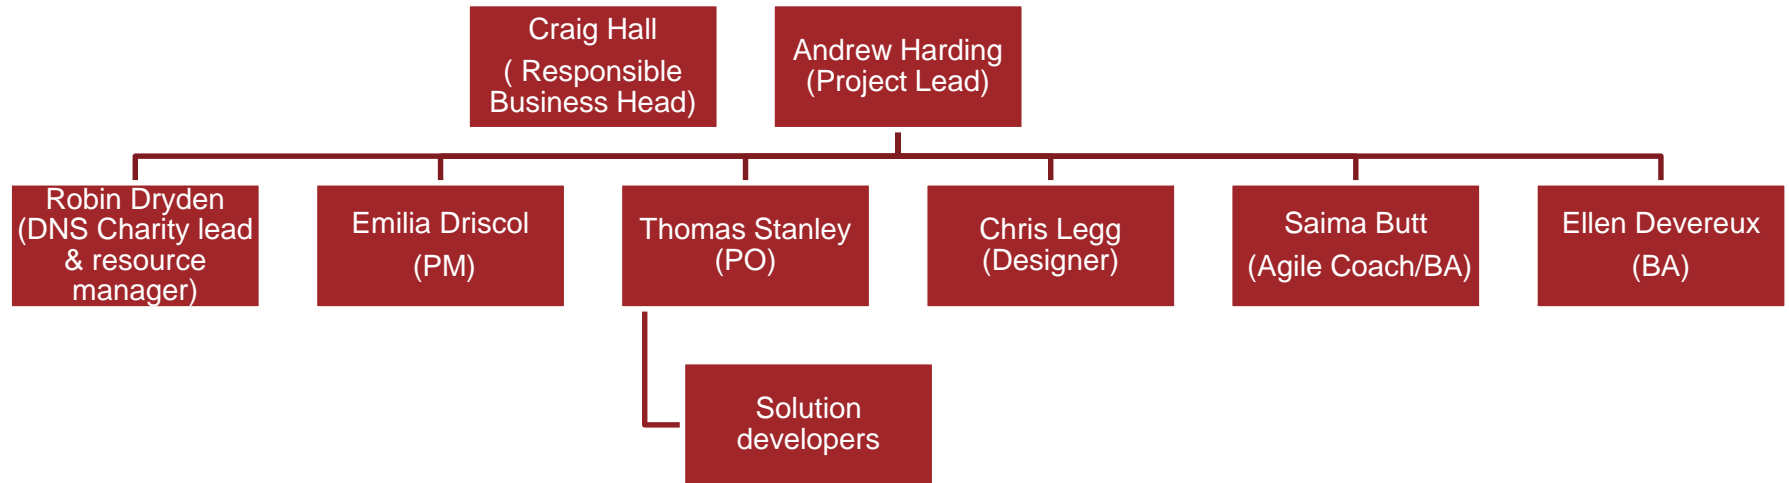

Kirstie Whitaker  
(Solution Owner)

Georgia Aitkenhead

# Fujitsu Org Tree

- Focus groups were hosted by Autistica to discuss with the Autistic community what they would want from the platform
- Transcripts were written up from the focus groups and user stories are being written up from these transcripts
- The user stories will be confirmed by the focus groups (to check they are a true representation of the initial opinions)
- Feb 10<sup>th</sup>: A prioritization session to choose which user stories are most important for the initial sprint (MOSCOW) and define
- Developers will begin the first sprint based on the prioritisation
