This is the AutSPACEs Presentation Template.

1. **This** slide will introduce why we created this template and google slides themes.

2. Slides **3-5** will provide you with the Style Guide for the presentation.

3. Slide **7** will provide links to resources to find more information.

4. The rest of this presentation showcases some examples of what you can do with the slides and different variations of the template.

5. For instructions on how to use this template please refer to the guide found Here.

We created this template using a custom created Google Slides Theme and Colour Palette so that we could quickly create presentations that used colour schemes and font sizing that have been approved by online accessibility checkers.

While the presentation and style might not be read by all screen reading software, we have designed these slides to be as accessible as possible. If you would like to give feedback or suggest changes, please reach out to the AutSPACEs team.

Style Guide

Titles: Medium Size 45

Heading 1: Medium Size 35

Heading 2: Medium Size 25

Subtitles: Normal Size 18

Body Text: Normal Size 12-18 (no smaller than 12)

Emphasis: **Medium + Highlight** in theme colour

Horizontal bars: 0.35cm height

Padded boxes and lines:
- 4 pixel weighting
- 1 cm vertical padding (see picture)

Auto-fit

◯ Do not auto-fit

◯ Shrink text on overflow

🔵 Resize shape to fit text

Padding

Top

| 1 | cm |

Bottom

| 1 | cm |

Left

| 0.25 | cm |

Right

| 0.25 | cm |

The theme's colour palette is based on the AutSPACE platform and is hard coded into this presentation.

You are welcome to mix and match colours, or suggest some alternatives as long as they score a 11 or higher for contrast against white (#ffffffff) or dark grey (#272727, #2c2c2c) text.
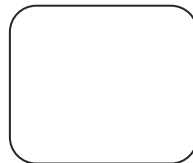

#ffc17aff

#a8a2ffff

#f1806fff

#309fdcff

#d966a5ff

#2c2c2c Text Colour.

#1bb5afff

#ffffffff White Space.

Resources

Where to find more information

- Click Here for instructions on how to "import" the Google Slides theme.
- Click Here for a link to the GitHub repository where **this template** is located.
- The folder on GitHub found Here provides different examples of presentations that we have given with AutSPACEs.
- We are collating a list of resources for where to find illustrations and icons that can be used in presentations Here.
  - You can also find the images drawn for our sibling project, The Turing Way, by clicking on the zenodo link Here.
- The GitHub repository Here is where we manage all the Project information for AutSPACEs.
- If you are still unsure, reach out to one of the team at our GitHub, join our Slack, come along to our bi-monthly meet-up sessions, or email a team member.

Example Presentation 1.

CITIZEN SCIENCE
AND CO-CREATION

Introduction to AutSPACEs

1/1/1001
Citizen Science Festival

This is a title.

- If you're using bullet points. Then do your best to emphasize the main points. Create a new bullet point for each new idea.

- And use spacing between each idea in order to make the text easier to read.

- Remember that not every screen is the same size so text should be size 14 or bigger. Size 16 font is used here.

This is a main point.

You can use the template subtitle slides to make a main point, or any of the examples below. The aim is to break up the flow of slides and highlight the most important information.
This is another title.

There are so many options for how to display text. If you're overwhelmed then check out some of the example presentations (you can find these in the GitHub repository).

There are so many options for how to display text. If you're overwhelmed then check out some of the example presentations (you can find these in the GitHub repository).

Sometimes you need to let pictures do the talking.

There are often two things to consider.

USE A TITLE.

There's no "wrong way" to display information. And sometimes you may need to create two columns.

IF YOU'D LIKE.

You can centralize these sections or have them aligned to the left-hand margin.

Plants are good for citizen science.

This is a good template for images. And providing short descriptions

Thank You!
